## SUMMARY

Dedicated computer science student with a strong foundation in programming, algorithms, and data structures. Hands-on experience in software development projects, including web development and mobile app development. Skilled in problem-solving and debugging. Passionate about technology and eager to contribute my skills to innovative projects. Seeking internships or opportunities to gain practical experience and further enhance my knowledge in the field.

## WORK EXPERIENCE

### Mobile development intern

**Xpertbot | remote | 2.2023 – 10.2023**

- Collaborated remotely with cross-functional team in the development of flutter-based mobile applications.
- Took an active role in optimizing the app's front-end for a smooth user experience, leveraging Flutter capabilities.
- Worked closely with backend developers, using Laravel, to ensure seamless data integration, database management, and API functionality.

### Operation machine

**Berdawni water | 12.2022-2.2023**

- Conducted routine machine inspections, troubleshooting, and minor repairs to minimize downtime and maximize productivity.
- Collaborated with a team of technicians and production staff to meet daily production targets and quality standards.
- Implemented safety protocols and adhered to company guidelines to ensure a safe working environment.

### Product coordination

**Daher food | 3.2023-4.2023**

- Coordinated the production of food product (Master chips), ensuring adherence quality standards and production schedules.
- Work using JDE to entry data and excel.

### Customer server

**Abeille d'or | 1.2024-present**

- Assisted customers with inquiries, complaints, and product/service issues, ensuring a high level of customer satisfaction.
- Processed orders, returns, and exchanges, maintaining accuracy and adherence to company policies.

## PROJECT

- **Ecommerce website (2022)** Developed a comprehensive eCommerce website, including features such as product catalog, shopping cart, login, and registration page.  
Language used: HTML, CSS, JavaScript, and PHP with MySQL.
- **Expense Tracking/budget App (2023)** Created a personal finance management application for expense tracking, budgeting, and financial reporting. Built with Flutter and Dart for cross-platform mobile

development, ensuring a smooth and responsive user experience. Features include expense categorization, automatic tracking, and budget notifications.

- **Gestion d'examen (2022)** Developed a comprehensive Exam Management system as part of a university project. This Java-based application facilitates the efficient management of exams.
- **Academic Project: Prototype Fabrication Simulation** Developed a Java application simulating prototype fabrication for OMEGA, focusing on project management, cost calculation, and real-time progress tracking using Swing, MVC, and Observer patterns. Implemented data handling and filtering features, enhancing software development and team collaboration skills

---

## SKILLS

---

- Java (Object Oriented Programming, Gui), JavaScript, HTML/CSS, PHP, Dart (flutter) ,python
- SQL, GIT, Data Structures, Algorithms,PL/SQL
- Communication skills
- Quick Learner

---

## EDUCATION

---

**Le Cnam** | *Bachelor of computer science*

*Beirut, birr hassan* | **8.2021-present**

**Saint famille** | *bac+2*

*Rayak, Bekaa* | **7.2021**

### Additional Courses

- Coursera (Daher foundation): JavaScript course with frontend language html, CSS, and JavaScript
- FreeCodeCamp: Responsive web design certification (HTML, CSS)
